ADD-300 Series

The ADD-300/ADD-330 Series has been designed for intense all day usage in the workplace.

With a flexible microphone boom, superior sound quality, steadfast re-enforced flexible boom arm and the use of stress and scratch resistant materials, the ADD-300 Series has been designed to withstand the toughest of call centre environments.

The lightweight design ensures low operator fatigue all day. With our robust re-enforced clickstop design, the ADD-300 Series allows the user to find the perfect microphone and headband positions so you can be confident that both headband and boom arm positioning will remain all day long without the need for constant re-alignment.

Let us know what connection method you prefer - the ADD-300 Series can be connected via a traditional telephone system, Unified Communications or alternatively it can be connected with Microsoft Lync. The choice is yours!

Microsoft Lync Compatible
