

ADD-COM Amplifier ADD-990

The ADD-COM Amplifier is designed to give you greater flexibility and control of your telephone headset. The volume control wheel makes it easy to find your perfect listening level.

Connect 2 headsets in the ADD-COM Amplifier, removing the need for a supervisor cord whilst offering the easy-to-use training feature in 3 different modes:

- A. Mute trainer only
- B. Mute agent only
- C. Mute both trainer and agent

Experience user versatility with the ADD-COM Amplifier's powering options. Whether you decide to use a USB cable, batteries, or the AC adaptor, the ADD-COM Amplifier gives you options to suit your desk layout.

Utilise the telephone/PC switch to swap between using your headset with your telephone and computer.
