

ADD-670 Wireless Headset

Possessing an impressive portfolio of features including Hotswap technology which gives users almost limitless talk time, the ADD 670 ensures you won't be caught with an uncharged headset. Utilising its second battery charger and swap-in-use function allows another battery to be charged and swapped at any time.*

The ADD-670 can also conference multiple headsets, utilises the latest noise cancelling technology to guarantee crystal clear clarity during calls and will provide up to 6.5 hours of "talk-time" per battery. The ADD-670 design allows the user customisable styles of wearing the headset; either "over-the-head" or "earhook" styles.

The ADD-670 comes with a two year standard warranty (and a 12 month warranty on batteries) in order to provide customers with a guarantee of the quality and durability of their products. The ADD-670 also provides quality sound for up to a distance of 150 metres from their bases and features online indicators in order to avoid confusion.

*Please note: extra battery not included
