

# ADDCOM® headsets

## ADD-695 Wireless Headset

the one for all your phones

ADDCOM Contact Solutions' eye-catching ADD-695 wireless headset allows you to connect all your phones to the one headset. Toggle between your deskphone, smartphone or softphone to experience ADDCOM sound quality at it's finest.

The coloured ear plates are user changeable. Colours can easily identify a person's or team's headset or simply be used to express individual flare. Your headset will arrive with a black ear plate and your choice of a second coloured ear plate.

With a sense of comfort that lasts all day and technology allowing you to move up to 100 metres from the base station, the ADD-695 also provides up to 8 continuous hours talk time.

Noise-cancelling technology gives clear conversations during calls and Acoustic Shock Protection safeguards users against acoustic shock and sudden surges in sound.

Use one headset to effortlessly manage calls on your desk phone, PC soft phone and smartphone. Switch communications between smartphone programs like FaceTime\*\* and PC programs like Skype for Business and Google Voice, and handset devices including Cisco, Avaya and Alcatel without difficulty\*.

Never miss another call with the ADD-695.

\* EHS Cord required for some applications

\*\* Does not work with your mobile phone or tablet when you are out of the office
