## ADD EHS 550 Connection Box

The ADDCOM EHS Headset Connection box offers headset users the freedom to move around the office and multi-task whilst still being able to monitor their telephone for incoming calls and answer calls whilst away from their desk, allowing for greater mobility in the workplace.

The ADDCOM-550 EHS Headset Connection box allows users to wirelessly answer their headset from a distance of up to 100 metres away. This replaces the need for traditional manual handset lifters.

The ADDCOM EHS box has been specifically designed to work with the ADD-670 and ADD-680 wireless headsets.
